

Motion sensitive toilet seat cleaner dispenser

Hygienic, economical, functional and practical.

This motion sensitive toilet seat cleaner dispenser, co-developed by **Venoplas** and **ulticom**, is an **innovation made in Germany**.

We have collected many years of experience and innovative detailed knowledge to develop a product which sets new standards that include hygiene, economic use, environmental compatibility and functionality.

We have collected many years of experience and innovative detailed knowledge to develop a product which sets new standards that include hygiene, economic use, environmental compatibility and functionality.

At the same time our dispensers offer the greatest possible comfort regarding handling and maintenance. The motion sensitive toilet seat cleaner dispenser has a new and self-calibrating sensor system which works reliably and prevents accidental set-offs. The quantity of toilet seat cleaner for each use is easily measured into exact doses (1.0 ml min.). A set of batteries lasts for at least 200,000 portions (that are 184 bags of toilet seat cleaner).

The pump system in the Venoplas toilet seat cleaner dispensers guarantees exact toilet seat cleaner doses. This does not depend on the condition of the battery charge. Together with our special toilet seat cleaner bags, it is an airtight system. Drying up and microbial contamination are avoided. The dispenser does not drip or leak. All toilet seat cleaners are delivered in an airtight bag-pump-system. Even a half-full bag of toilet seat cleaner is easily removed from the dispenser without dripping or coming into contact with air or germs in the air.

Also mounting is very easy. The various recesses at the back of the casing make it possible to use any pre-existing mounting hole.

Venoplas toilet seat cleaner dispensers are...

hygienic

- Without direct contact
- No microbial contamination - because of the airtight system
- Even a half-full bag of toilet seat cleaner is easily removed from the dispenser without dripping or coming into contact with the air

economical

- Accurate and constant dosage starting at 1.0 ml per pump
- A set of batteries lasts for at least 200,000 portions (184 bags of toilet seat cleaner)

functional

- The dispenser is constantly self-calibrating (depending on the environment)
- Exact doses independent of battery status
- Bags can be taken out without microbial contamination of the toilet seat cleaner

practical

- Various mounting holes at the back of the casing ensure easy mounting
- Easy to operate

Specifications

- Electronic, without direct contact
- Electronic, self-calibrating
- Exact doses starting at 1.0 ml
- Airtight bag-pump-system
- Leak proof, no drops
- Easy to operate
- Battery operation
200,000 portions/set of batteries
- Indication window/metal lock
- Wall mounting
- H 280 x W 105 x D 108 mm
- In the following colours:
high-grade steel design
